

CALLING ALL OH&S AND OPERATIONS MANAGERS.

You can depend on CRS two-way radio accessories to not let you down.

CRS Accessories supply quality two-way radio accessories and spares to the mining and resources industry for a wide range of two way radio equipment. These include innovative two-way accessories which provide excellent Occupational Health and Safety benefits, especially for lone workers, and improved operational understandings and efficiencies for groups or individuals operating in the field.

As you'll discover, our in-depth and expert understanding of the two-way radio communications field qualifies us to provide the right advice and extremely reliable and functional products.

Now you can pinpoint a worker's location, wherever they are located.

CRS Accessories GPS Microphone and CRS smart mapping software will help you find a worker's real-time location from your desktop within THREE CLICKS and a few seconds. The CRS GPS Microphone will work wonders with any Kenwood radio that has GPS functionality built into it, including in-vehicle radios.

When you need your hands free but still need to talk, the wireless PTT is the key.

Another CRS innovation is the Wireless Push To Talk (PTT) adaptor. The button can wrap around your finger, steering wheel or lever – so there is no need to have to reach for your radio to answer a call, you simply push to talk. The CRS wireless PTT connects to all popular brands.

CRS Accessories wide range of high quality, heavy duty aftermarket accessories and spares for two-way radio use include:

- Antennas
- Audio Adaptors
- Batteries
- Chargers
- Earpieces
- GPS Microphones
- Headsets
- Leather Cases
- Microphones
- Bluetooth
- Specialist Audio
