

THE INNOVATIVE ALTERNATIVE TO HEADSETS

CRS ACOUSTIC AIRTUBE EARPIECES

Designed to protect hearing and provide exceptional audio quality in high noise environments.

Thanks to CRS, you can now provide staff with hearing protection in high noise environments, such as motor sport, night clubs and construction – a cost effective alternative to Heavy Duty Noise Canceling Headsets.

The dual airtube is combined with the CRS-AEP providing hearing protection to 25db (Class 5 rating) in extremely noisy environments.

CRS ACCESSORIES Long Acoustic Airtube earpiece

Designed for covert surveillance where discreet communication is essential.

Featuring an innovative screw in thread that screws the airtube into the transducer means that each staff member can be issued with their own personal long acoustic airtube – presenting significant cost savings.

This extremely versatile product connects to a CRS 1,2 and 3 Wire Harness Kits, Throat Microphones, Bluetooth. etc.

CRS Acoustic Airtube Features include:

- **A REPLACEABLE EARPIECE:**
A hygienic, cost saving solution for staff sharing radios and accessories. The earpiece can be replaced or interchanged with the following earpieces: Earbud, Earhook, Earhook Large, Mini Speaker, D Hook, Short Airtube, Long Airtube, Long Dual Airtube or Long Moulded Airtube.
- Surgical grade acoustic tube – comfortable and discrete.
- Replaceable clothing clip.
- Adjustable angle on airtube outlet.
- Super flexible PU cable reinforced with Kevlar for maximum durability.
