

FEATURES

YOU NEVER KNEW EXISTED

Battery Eliminator

The Battery Eliminator's function is to give you an uninterrupted power source for your handheld radio. Simply connect the eliminator to a DC 12 volt supply, then remove the existing battery from the radio and connect the battery eliminator in its place. The handheld radio is now powered directly from an independent power source so there is no need to recharge your battery.

The Battery Eliminator will extend the life of your handheld radio battery while you are out in the field effectively eliminating the need of carrying a spare battery.

Heavy duty noise cancelling headset, featuring:

1. Noise cancelling heavy duty dual earmuff headset.
2. Your choice of earcup PTT or inline PTT.
3. Quick disconnect cable with added strain relief to prevent damage to the socket.
4. One headset suits ALL MODEL RADIOS.
